

Ong Jun Xiong

AI Infrastructure & Backend Engineer

Singapore | junxiongong2@gmail.com | junxiong.dev | github.com/ong6 | linkedin.com/in/junx6

Profile

I build production agent runtimes, tool servers, and backend platforms. At TikTok, my work spans the shared AI layer and the Go services beneath global e-commerce operations. I also founded and sold a one-person AI solutions company.

Experience

TikTok, Global E-commerce

Singapore | Apr 2024 – Present

AI Infrastructure Engineer

Oct 2025 – Present

- Built the team's agent platform from zero: an A2A and LangGraph runtime, a Go MCP server, and a React chat SDK that other product teams build on.
- Put the platform into daily use with operations teams across the US, Southeast Asia, and the UK. Multi-step workflows that took minutes now complete in under 30 seconds.

Software Engineer, Backend Platforms

Apr 2024 – Oct 2025

- Built Go and gRPC promotion backends and React tools serving campaigns across more than 13 markets.
- Worked on seller analytics and creator systems backed by ClickHouse and Hive, including Campaign Workbench and video diagnosis products.

Compoze

Singapore | Jan 2025 – Dec 2025

Founder

Built alongside TikTok

- Built and ran a one-person AI solutions company. I handled discovery, scoping, pricing, delivery, and client training.
- Shipped retrieval-augmented chat products with LlamaIndex, FastAPI, Next.js, and LlamaCloud. A client acquired the company at the end of 2025.

Earlier experience

Binance | *Payments Engineering Intern* | TypeScript and React payment experiences for Crypto Box and checkout systems on a platform serving more than 128 million users Aug – Nov 2023

Thought Machine | *Client Engineering Intern* | Python tooling and tailored core-banking delivery May – Aug 2023

Tanso, Munich | *Full-stack Engineering Intern* | TypeScript and Next.js carbon-accounting product Jul – Dec 2022

DBS Bank | *Backend Engineering Intern* | Java and Spring Boot transaction-banking services May – Jul 2022

Technical Skills

AI systems: MCP, A2A, LangGraph, LlamaIndex, RAG, agentic workflows

Backend: Go, TypeScript, Python, Java, gRPC, REST, Kafka, Redis

Data and infrastructure: MySQL, PostgreSQL, ClickHouse, Hive, Docker, Kubernetes, AWS

Product: React, Next.js, distributed systems, client delivery, technical scoping

Education

National University of Singapore

Singapore | Aug 2020 – Dec 2023

Bachelor of Computing (Honours), Computer Science

AI and Software Engineering

- NUS Overseas Colleges in Munich. Teaching assistant and Student Mentor Award recipient; President of the NUS Fintech Society.
